

EDUCATIONAL WORKSHOPS

IN A FOREST NEAR YOU

ARBASKA

Inspired by school programs, Arbraska develops learning workshops that give students the opportunity to discover the world around them and also put into practice basic scientific concepts in an immersive and playful setting.

INSECTS (3 to 5 years old)

Appreciate the world around us while discovering the universe of insects.

- Developing a sense of belonging
- Cognitive-motor skill learning
- Reading non-verbal language signs

MOVEMENTS (5 to 7 years old)

Developing psychomotricity through a series of games inspired by Arbraska adventures.

- Learning to handle carabiners
- Experiencing movements on an obstacle course
- Exploration of the concept of gravity

TREES (7 to 9 years old)

Discover the secret life of trees through exploration games and scientific experiments.

- Using a compass
- Learning forest types
- Introduction to active listening

CREATE A MULTI-SENSORY EXPERIENCE
